It's been a busy month at Brill Power where our BESA BP6X1 has gone through rigorous testing and is beginning shipments to customers. To get the most out of our Battery Management System+, we are also thrilled to be launching our three cloud-based products from the BrillAnalytics range.

2024 has been a busy year at Brill Power. We've brought our BESA BP6X1 product to market, undertaken extensive testing in our lab to validate the system up to 850V and supported customers on 3 continents to integrate ...

8th April 2024, Oxford, UK - How can AI support the energy transition? Energy Manager Magazine looks at this, speaking to Brill Power's co-founder and Chief Data Scientist Adrien Bizeray who explains how our market-ready AI system mitigates factors that impair overall system performance and confirms that Artificial Intelligence has a crucial role to play in enhancing the ...

Our patented battery management system (BMS) technology, developed at the University of Oxford, can make batteries live up to 60% longer and can extract more than 120% more energy from used batteries compared to conventional BMS solutions. All advanced battery systems need a BMS, and Brill Power can deliver improvements to all applications, ranging ...

Brill Power successfully achieved a Series A round raising of \$10.5m in 2022 to support their mission to make batteries smarter, cleaner, safer and longer-lasting as a critical element of the shift to zero emissions energy. The funding supports team growth and new product development to expand presence in both static energy storage and the ...

Brill Power, located in Oxfordshire, offers the Battery Intelligence Platform, a cutting-edge solution that revolutionizes the performance, longevity, cost, and sustainability of batteries used in electric vehicles and stationary energy storage. This platform integrates battery and power management, edge computing, and data analytics to replace ...

Lots going on at Brill Power this autumn with a busy period of intense testing in our UK lab in Oxford and the FCC approval of our BMS+ Power Converter. Volume shipment has also started with hundreds of BESA BP6X1 units being dispatched to reach their final destinations in our partners' BESS in Europe, Australia and the US. ...

Brill Power's Battery Intelligence Platform transforms energy storage by providing an end-to-end solution, which is both scalable and customisable. The Battery Intelligence Platform directly resolves many of the challenges that exist with energy storage where battery lifetime is far shorter than the life of the energy storage project.

Brill Power's first BMS+ for the stationary storage market launched in 2021 followed by its second product, the BESA BP6X1 BMS+ in 2023. The technology can dramatically reduce the need for augmentation and oversizing of a stationary energy storage installation. Every 100kWh (50kW) stationary energy storage system that uses a BESA Battery ...

Founder Palmer Automotive (Consulting & Turn-around Interim); Chairman Inobat Auto; Chairman PodPoint plc; Chairman HiLo; Chairman Ionetic Ltd; Chairman Brill Power Ltd; Founder Palmer Foundation; Entrepreneur (LP) · More than 45 years experience in the automotive industry having previously been COO of Nissan, President and Group CEO of Aston Martin Lagonda ...
