

How much energy does Slovenia produce?

Slovenia generated 68.8% of its electricity with zero carbon or carbon neutral sources in 2019, dominated by nuclear power and hydroelectricity. Fossil fuels oil, coal, and natural gas contributed 61% of the total energy supply of Slovenia in 2019.

Does Slovenia use oil to generate electricity?

Following steep declines in use since 1990, Slovenia eliminated the use of oil for generating electricity in 2019. Renewable energy sources other than hydropower (e.g., biofuels, solar PV, waste, and wind) together provided 3.5% of total electricity generation in 2019.

Is Slovenia a nominated electricity market operator?

The Energy Agency publishes invitation for the designation as a Nominated Electricity Market Operator for the Slovenian bidding zone for an indefinite period of time. We present key data on the Slovenian electricity and gas markets, consumer protection, supply with heat, and energy efficiency.

What is Slovenia's electricity consumption?

View the detailed consumption trends at country level (graphs, tables, analysis) in the Slovenia energy report. Electricity consumption remained stable at 13.8 TWh in 2019, after 2.1%/year growth over 2009-2018. Before the economic crisis, electricity consumption grew quite rapidly (+3.3%/year between 2000 and 2007).

Is biomass a source of electricity in Slovenia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Slovenia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

What will Slovenia do with renewables in 2020?

Under the EU Climate and Energy package, Slovenia was expected to raise the share of renewables in final consumption to 25% in 2020, of which 39% for electricity, 30.8% for heating and cooling, and 10.5% for transport.

The agency has published a Report on the energy situation in Slovenia for 2023. The report presents in detail the situation and development of electricity and natural gas markets, achieving the goals of electricity production from RES and CHP, consumer protection, end-use energy savings and heat supply.

The new report on the energy situation in Slovenia for 2023 is available. Every year, we gather, describe, and analyse the key data on Slovenia's electricity and gas markets, consumer protection, heat supply and energy efficiency. Invitation for designation of Nominated Electricity Market Operator.
