

The Energy Management Systems Market is expected to reach USD 63.64 billion in 2025 and grow at a CAGR of 15.65% to reach USD 131.67 billion by 2030. IBM Corporation, Rockwell Automation, Inc., General Electric, ...

Buildings are evolving from passive energy consumers to active grid participants. This shift is driven by Active Load Management (ALM) systems - intelligent solutions crucial for optimising ...

SMART BUILDING EXPO is the technological heart of MIBA- MILAN INTERNATIONAL BUILDING ALLIANCE, the place where system integration becomes reality and gives life to truly smart buildings and cities. Digitalisation, ...

Smart buildings are the product of the development of modern science. The smart building system is mainly composed of Internet of Things technology, modern computer technology, and smart building sensors. Smart ...

In terms of smart building management, based on the iBUILDING digital platform, the integrated operation and maintenance of its own access control systems, vehicle barriers and other IoT ...

These startup develop smart HVAC, lighting systems, energy storages, solar roofs, energy management systems, sustainable building materials and other technologies for energy-efficient buildings. Redaptive is an ...

The revolving door air curtain market, currently valued at \$343 million in 2025, is projected to experience robust growth, driven by increasing energy efficiency concerns and the rising ...

The International Conference on Systems for Energy-Efficient Buildings, Cities, and Transportation (ACM BuildSys) is a highly selective, single-track forum for research on ...

Smart building technology involves the use of interconnected devices, sensors, software, and data analytics to manage building operations such as heating, ventilation, lighting, security, and ...

The market demand for solenoid valves in building automation and control systems has been experiencing significant growth in recent years. This surge is primarily driven by the increasing ...

An example of the insights gathered in a smart building Smart buildings are revolutionizing the way we interact with our spaces by seamlessly integrating technology and design. From energy efficiency to enhanced comfort, these ...

Smart building energy systems

Detailed info and reviews on 49 top Energy Management companies and startups in Germany in 2025. Get the latest updates on their products, jobs, funding, investors, founders and more.

The Smart Building Market is segmented by Component (Solutions (Building Energy Management Systems, Infrastructure Management Systems, Intelligent Security Systems), Services), by Application (Residential, ...

For instance, in smart building systems, HVAC systems are generally connected to other networked devices providing more chances for malware attackers to control energy systems and threaten human life.

In order to maintain sustainable and smart home automation systems, we need plumbing systems that integrate well with the rest of the building. A standing water alert system, smart faucets, drain alert system, leak ...
