

Buying solar batteries in bulk and the wholesale price will give you the opportunity to set your own price considering the average price range in the local market. First, you can check in which price range your competitors are selling their products.

The biggest factor that impacts the price of a solar battery is its capacity - the total amount of energy that it can store. Typically home batteries can store between 10 and 20kWh of electricity, and while bigger batteries come with a bigger price tag, they cost less per kWh of usable capacity. Solar Battery Price Factor 2: DC vs AC
