

Most of Sudan's electricity generation comes from around 3.2 GW of hydropower. According to the latest statistics from the International Renewable Energy Agency, Sudan had only 19 MW of installed solar power at the end of 2019. The Sudanese government is aiming to install 500 MW of solar and 300 MW of wind by the end of the year.

The UNDP, in partnership with Kassala authorities, has inaugurated two solar-powered water pumps, doubling Kassala City's water supply to 450,000 liters per day. This initiative aims to provide a sustainable water source and address ongoing shortages for residents and internally displaced persons.

Solar Products Distributors Distributors are those companies working as big warehouses that served as the middlemen between the consumer/customer and the manufacturer. Typically, in distribution, a company is handling the sourcing, stocking and logistics but nowadays they are also helping manufacturers in product designing and solving other business conflicts. Aside ...
