

The Beznau nuclear power plant in the canton of Aargau has been partially disconnected from the grid due to the heat. One of the two reactors has been shut down, and the second unit is still ...

A team of researchers at the Swiss Federal Laboratories for Materials Science and Technology (Empa) has proposed a public sector-based basic solar supply. According to ...

In recent years, the drive toward sustainability and environmental stewardship has led many farmers to explore renewable energy sources for their agricultural operations. Ecofarms, which ...

The United Nations reports a global shift toward renewable energy, calling it a "positive tipping point." Tuesday's U.N. reports reveal that 92.5% of new electricity capacity in 2022 came from ...

Switzerland's Energy Strategy 2050 mandates a sevenfold increase in solar capacity by 2035, elevating generation from 6% to significantly higher levels. Railway-based solar is one ...

Swiss International Air Lines (SWISS) has integrated the solar fuel manufactured by cleantech startup Synhelion into its regular flight operations, becoming the first airline to do so.

Swiss International Air Lines (SWISS) has become the first airline in the world to integrate the solar fuel manufactured by the Swiss-based Synhelion clean-tech company into its regular ...

SLSEA - Sri Lanka Sustainable Energy Authority As the governing body responsible for pioneering the sustainable energy revolution in Sri Lanka, we aim to facilitate the development of our nation's rich energy resources, ...

The environment watchdog has rejected a proposal by a controversial Turkish businessman to build a 50-megawatt solar power plant in Laikipia County, citing gaps in cost disclosure and ...

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on Earth is vastly in excess of the world's energy ...

Results based finance Energy Compacts Launched by UN-Energy (United Nations mechanism for inter-agency collaboration in the field of energy) at the 2021 High-Level Dialogue on Energy - Energy Compacts are voluntary, ...

What is Solar Energy? ? Sunlight is an important reusable energy source for converting solar energy into electrical energy through solar panels. We can use solar energy as clean energy ...

Soleil's, the second edition of the Solar Biennale, is currently open at mudac, the Museum of Contemporary Design and Applied Arts in Lausanne, Switzerland. Following the first edition ...

Detailed info and reviews on 12 top Climate Tech companies and startups in Switzerland in 2025. Get the latest updates on their products, jobs, funding, investors, founders and more.

In a major leap for clean energy, scientists have figured out how to make solar panels that are lighter, more efficient, and -- for the first time -- durable enough for everyday ...

Switzerland is pioneering solar-powered trains, a bold move towards a greener future. While the specifics of the Swiss solar train initiative are not yet fully detailed in the provided text, the ...
