As it is known Ethiopia aspires to build a climate-resilient green economy and such a venture necessitates changing the utilization of carbon-based energy sources into a renewable one ...

Mogadishu (HOL) -- Djibouti and Egypt have signed a landmark agreement to build a 276.5-kilowatt solar power plant in Djibouti. The deal, signed during a virtual meeting, is expected to boost Djibouti's energy independence ...

Ethiopia's decades-old energy policy is evolving rapidly, opening doors for private sector involvement in renewable energy and clean technology. Spearheaded by the Ministry of Water & Energy, the policy targets two vital ...

In Ethiopia, where millions still live without consistent access to the grid, the future of energy access lies in decentralized, renewable solutions - and it's already taking shape. Off-Grid...

Families in rural Ethiopia are transforming their lives with clean energy. Supported by the World Bank's Ci-Dev, biogas digesters replace firewood, cutting smoke and improving crop yields. ...

Zambia has started to implement a rural electrification programme aimed at providing a stable energy source to schools, healthcare facilities and communities in the country's Western ...

Geothermal energy's moment is here. Once constrained by niche geologic resources, the ability to produce ubiquitous, clean power and heat from the earth's crust is now on the horizon. Thanks ...

From Ethiopia, Mr Tegene Mengeste, a Development Planning and Policy Advisor for the Ethiopian Government, shared examples of several social protection initiatives addressing SDG 1 and SDG 4, including a school feeding programme.

Developed in partnership with the Global Energy Alliance for People and Planet (GEAPP), the project aims to attract private sector investments in energy access and address the water-energy-food nexus in Ethiopia.

Solar photovoltaic (PV) installations are proliferating, with large-scale solar parks taking shape in Egypt, South Africa, Morocco, Kenya, and Ethiopia. Off-grid solar mini grids and home ...

This strategic shift aims to attract private investment, boost electricity supply, and modernize the country's power market, according to the Ethiopian Energy Outlook 2025 published jointly by ...

The chapter mainly introduces the development background and international development status of SSP. Energy crisis and global climate change are major issues that affect global sustainable ...

Renewable divide: Growth widening gap between regions 16 July 2025 Battery Energy Storage Maldives: Fari Islands to meet 50% of energy needs via solar 15 July 2025 Future Energy Dark reality: 1.6 Million households lack ...

Find out more about how the World Bank's Carbon Initiative for Development (Ci-Dev) is helping to expand clean energy access and support smart energy solutions in Ethiopia and beyond. ...

Increasing Ethiopian women's participation in and impact on the energy sector by spotlighting, training, and connecting them to lucrative and meaningful professional opportunities with the ultimate goals of increasing ...

Despite comprising 20% of global Development Finance Institutions (DFIs), Africa holds just 1.9% of assets, underscoring the need for capacity building through regional technical assistance ...

Off-grid solar systems are bridging the energy divide in rural and peri-urban areas. Unlike traditional grid infrastructure, which is expensive and slow to expand, solar technology can be ...

Circular economy startup Inter Ethiopia Solutions (IES) is refurbishing solar home systems and repurposing lithium-ion batteries that would otherwise be discarded as waste in order to ...

Based on the research findings, the cities of Asayita, Dubti, and Samara in the Afar region of Ethiopia have evaluated global sun radiation that is advantageous for solar energy application. ...
