After space heating and cooling, heating water is the second largest source of energy consumption in most households in Australia. That is why replacing your existing hot water heating system with a heat pump for hot water heating purposes is a brilliant idea.

With solar panels and an inverter, you can capture the sun's energy and convert it into usable electricity for your home or business. If you add battery storage to your system, you can store excess energy generated during the day and use it at night or during bad weather.

Solar hub installed my panels and battery in 2019 and they were super. This latest visit was because my system is old and the chap who came was polite and got on so quickly that he was gone in no time. Said he would submit the report ...

From the first enquiry about how solar works, customising and installing the perfect system for their needs, to providing them with strategies and technologies to optimise their system, we are committed to helping our customers ...

A smarter way to produce and use energy. Residential solar energy generation and storage are transforming the power grid. With more and more Australian homeowners supplying energy to the grid, the electricity network is changing into a bottom-up community resource.

The Smart Distributed Batteries Project offers a \$4,950 discount on a Tesla Powerwall 2 as part of the first NSW Government-funded Virtual Power Plant (VPP). This initiative is supported by a \$5.4 million grant to develop a 6MW VPP and encourages battery installation by offering discounts for joining the VPP.

Solar hub installed my panels and battery in 2019 and they were super. This latest visit was because my system is old and the chap who came was polite and got on so quickly that he was gone in no time. Said he would submit the report to Evoenergy and ...
