

Are solar energy projects coming to the Democratic Republic of Congo?

Two major solar energy projects have been announced in the Democratic Republic of Congo (DRC) in the space of a week as investors target one of Africa's least electrified markets.

What is the capacity of a solar power plant in DRC?

With an expected capacity of 100 MWp, the plant will be connected to the DRC's national electricity grid. The Democratic Republic of Congo (DRC) is at the centre of a solar photovoltaic energy project.

Why did the DRC invest in a 100 MWp solar project?

The Lualaba province, where the city is located, has large deposits of copper, cobalt, uranium and radium. According to the IFC, the investment in the 100 MWp solar project underscores "its commitment to innovative early-stage energy projects and the DRC government's efforts to increase and diversify its power generation.

How many solar homes will DRC Finance in 2021?

The first debt financing round will finance over 3,000 solar home systems and is expected to reach nearly 14,000 people with clean energy across 21 of DRC's 26 provinces. Later debt financing rounds will follow in 2021.

How many people have electricity in the Democratic Republic of Congo?

Goma hybrid solar project in the Democratic Republic of Congo According to the World Bank, only 19% of the DRC's around 102 million people have access to electricity. This translates to about 41% in urban areas and 1% in rural areas.

How will a solar hybrid mini-grid work in DRC?

MIGA said CESL is developing, building and operating solar hybrid mini-grid projects through Nuru SASU in DRC to generate up to 15MW of electricity. Once completed, the project will provide electricity to around 28,000 households and businesses that "currently have expensive, unreliable, unsustainable, or no access to electricity."
