

Solar system products Pitcairn Islands

Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km² and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.

Are Pitcairn Islands products available online?

Now, Pitcairn Islands' products are even available globally via its official government website. Islanders hope that having an internet connection will help raise awareness about the island and what it can offer tourists. Since the highest-quality education is not available to the children of Adamstown, many children and teens go away to school.

about the Pitcairn Island distribution system might be of interest: ATTACHED is a document describing, in non-technical terms, what's there now, and proposing a solar boost for the diesel generators. (System description starts on PDF page 4.) What is equally fascinating is to take a tour of the "streets" via google maps, using STREET VIEW option.
