

The present work regards the study of a standard photovoltaic module operating in Bucharest sky conditions (44°N latitude). Meteorological data such as air temperature, global solar radiation ...

The SMTL Solar Bughea project is currently in a ready-to-build stage, possessing all necessary permits and approvals for construction. Its development was initially separate from Simtel ...

These hot molten salts liquids reach temperatures of up to 565°C. They are typically stored in large metal tanks, supplying stored solar energy that powers the solar thermal power plant, ...

Review on concentrating solar power plants and new developments in high temperature thermal energy ... Two-tank molten salt storage for parabolic trough solar power plants ...

Sustainability and feasibility of solar-powered cooking stove technology, as a clean energy solution, for the low-income and rural communities in the Global South were discussed in this ...

The Government of Montenegro adopted urban planning and technical conditions for a solar power plant of 81.1 MW in peak capacity in Pljevlja. The site for the facility is part of a coal ...

Romania's own electricity output and imports totalled 28.81 TWh in the review period, up 3.4% year-on-year. Domestic electricity production alone fell 9.5% to 21 TWh. Thermal power ...

Image by: 50Hertz. Thermal power plants accounted for the largest share of gross electricity production in May, at 50.6%, Makstat said in a statement on Friday, citing preliminary data. ...

This article gives a clear account of alumina-based materials used in solar thermal energy systems. It covers solar thermal conversion, how high stability materials are important, and ...

R.Power Group, a prominent force in the solar energy sector, has recently secured a 55 MWp solar farm project in Romania through the latest energy auction. This development is a pivotal ...

Greece is the most successful by far in the Balkans in transforming coal land into clean energy and advanced technology hubs. The projects in the region are mostly for solar power plants. ...

As the demand for solar energy continues to grow, further advancements and refinements in passive cooling technologies will be crucial. The future holds promise for new materials and ...
