

# Solshare system Saint Pierre and Miquelon

What is a solshare system?

**Introduction to the SolShare System** The SolShare distributes the power generated from a single solar energy system to up to ten participating tenants. This enables connected tenants to benefit from the full current generation of the solar system. The SolShare operates as a power division control system.

How does solshare work?

SolShare accepts a three-phase AC supply and distributes each of the three-phase inputs to five outputs, for a total of 15 output connections. SolShare does not transform power, it is not acting as an inverter or switch mode power supply. SolShare monitors delivery of AC energy, and the AC energy requirement (demand) of each connection.

What are the key features of solshare technology?

Solshare technology boasts several key features and components: **Dynamic Energy Allocation:** Solshare distributes solar energy to connected units based on their consumption patterns. **Scalability:** The system can be scaled to accommodate different building sizes and its energy needs.

How do I design a solshare Solar System?

When designing a SolShare solar system, one of the most powerful elements is the ability to allocate a specific proportion of the system to each flat. This allows for maximum benefit from the available kWp and maximise SAP score /EPC uplift. You must allocate the proportion of the solar system that is to be associated to each connection.

What are the components of a solshare system?

The Solshare system comprises several technical components: **Solar Panels:** Photovoltaic (PV) panels that generate DC electricity from sunlight. **Inverter:** Converts DC electricity from the solar panels into AC electricity suitable for household use.

Why should you choose solshare?

**Scalability:** Easily scalable to accommodate future expansions in solar capacity or additional units. The **Microgeneration Certification Scheme (MCS)** confirms that solar PV systems using SolShare can be installed according to relevant MCS standards. Each flat receives an individual MCS certificate based on its associated kWp following commissioning.

**Saint-Pierre:** With Allan Hawco, Joséphine Jobert, Benz Antoine, Erika Prevost. After exposing corruption, a Newfoundland cop is exiled to French islands where he teams up with a headstrong deputy to solve baffling crimes beyond the idyllic locale's facade.
