

South Sudan power cabinets

How much electricity does South Sudan use per capita?

Per capita electricity consumption in South Sudan is about 1 to 3 kWh, compared to 80 kWh in Sub-Saharan African, and is the lowest in the region.

How many people in South Sudan use firewood?

According to the National Baseline Household Survey in 2012, over 96% of the population in South Sudan use firewood or charcoal for cooking. Only 1% of the population has access to grid electricity and those are mainly located in Juba, Wau and Malakal, the three cities with the only three isolated distribution systems in South Sudan.

Does Bank support Juba PDSRE project?

The proposed Bank support to Juba PDSRE Project is in line with the South Sudan Development Plan and South Sudan Infrastructure Action Plan both identifying infrastructure as a core priority for South Sudan.

Why should South Sudan upgrade its electricity supply?

The upgraded and reinforced electricity supply will contribute to improve the quality of service provided by the national utility; the quality of life of residents; and promote businesses, hence contributing to economic growth and poverty reduction in South Sudan.

How does hot weather affect power supply in South Sudan?

Increased temperatures cause power distribution lines to sag. Dry hot weather in South Sudan is also accompanied by high speed winds which can knock down distribution poles causing short circuiting and power outages affecting power supply. This is mitigated by use of concrete poles and insulated conductors.

What is the current power supply for Juba?

3.2.2.2 The current power supply for Juba is from a few generators (7 x 1.38 MW) being operated by SSEC. These will be rehabilitated with JICA support and an additional 5 machines will be installed. The generators will be fitted with gas emission reduction filters.
