

How much photovoltaic power is installed in Spain in 2022?

7. According to data from Appa Renovables' annual photovoltaic self-consumption report, in 2022, 2,649 MW of new photovoltaic power was installed in Spain in self-consumption facilities.

Why are rooftop solar installations booming in Spain?

Rooftop solar installations have been surging in Spain as the country is trying to transition to cleaner fuel sources, and the Ukraine-Russia war has accelerated the process. For instance, according to the Spanish Solar Photovoltaic Association (UNEF), in 2020, rooftop solar PV installation was recorded at 596 MW, compared to 459 MW in 2019.

What will Spain's residential self-consumption market look like in 2023?

Union Española Fotovoltaica (UNEF) estimates that in 2023 the Spanish residential self-consumption market will fall between 25% and 50% compared to last year. Companies such as Holaluz, Solarprofit and Svea Solar are already negotiating Employment Regulation Files.

How does Spain promote self-consumption of solar energy?

Promotion of Self-Consumption: The Spanish government has taken significant steps to promote self-consumption of solar energy, including the approval of a road map with over thirty measures aimed at facilitating its deployment.

Is Italy on the move on solar energy?

Italy is on the move on solar energy. The legislative framework has finally shifted towards self-consumption, energy sharing and energy communities, at least for small-scale plants, and so have the incentives schemes and authorization procedures, even at local level.
