

Sri Lanka renewvia energy corporation

Should Sri Lanka use water bodies for solar power generation?

With limited land availability for traditional solar installations,utilizing water bodies for solar power generation presents a smart and innovative solution. This strategy supports Sri Lanka's ambitious national goal of generating 70% of its electricity from renewable sources by 2030.

What is Sri Lanka's first solar PV powered agrivoltaic pilot project?

The Asian Development Bank (ADB) together with the Ministry of Power and Energy (MOPE),and Ministry of Plantation Industries (MOPI) inaugurated Sri Lanka's first-ever semitransparentsolar PV powered Agrivoltaic pilot project. This marks a significant milestone in the country's clean energy and agricultural landscape.

Will Sri Lanka be able to use wind and solar power?

With hydropower largely exploited to the optimal levels,there has been an increased effort to include wind and solar power generation to the national grid. The Government is now accelerating this process to ensure that by 2030,70 percent of Sri Lanka's electricity needs are fulfilled by renewable energy sources.

Can agrivoltaics improve food security and energy access in Sri Lanka?

Agrivoltaics offers a unique opportunity to address both energy security in a land constrained country like Sri Lanka and its agricultural challenges. This project will serve as a model for wider applications for achieving sustainable food security and energy access in the country.

Is Sri Lanka a 'paving the way to an energy secure Sri Lanka'?

Speaking on the theme 'Paving the way to an energy secure Sri Lanka',President Wickremesinghehighlighted the substantial potential of Sri Lanka's renewable energy sector. He further outlined the Government's initiatives over the past two years to establish an investment-friendly environment in the renewable energy sector.

What percentage of Sri Lanka's Electricity is generated by hydropower?

Even today,hydropower accounts for around 40 percentof Sri Lanka's installed electricity generation capacity. With hydropower largely exploited to the optimal levels,there has been an increased effort to include wind and solar power generation to the national grid.
