

# Sweden hdt energy

What type of electricity is produced in Sweden?

Renewables and nuclear are given as the electricity produced. Energy in Sweden is characterized by relatively high per capita production and consumption, and a reliance on imports for fossil fuel supplies. With 98% of electricity generation coming from renewables and nuclear in 2023, the electric grid is nearing zero emissions.

Is solar energy a sustainable technology in Sweden?

The Swedish solar cell market is still limited, with solar energy accounting for around 1 per cent of the total energy generated. In the transition to a sustainable society, wave power may be an important technology in the future, but it is still relatively undeveloped - both in Sweden and abroad.

Who is HDT Group Limited?

Its mission is to enable projects in order to exponentially increase the return on investment of its business partners. The company is a division of HDT Group Limited, present in China, Hong Kong, Brazil and Panama. We are the transforming agent focused on high-value solutions for the green technology market.

How much energy does Sweden use?

Eurostat data (2022) shows 66% of Sweden's total final energy consumption comes from renewables, broken down as 83.3% in electricity consumption, 69.4% in heating and cooling, and 29.2% in transport. Energy figures converted from Mtoe using conversion factor 1 Mtoe = 11.63 TWh.

What are the key elements of Sweden's energy transition?

The electricity system is another important element in Sweden's energy transition. Sweden has largely decarbonised its electricity generation through investments in nuclear power, hydropower, and most recently, other renewables. This is an important achievement that needs to be sustained.

How can Sweden maintain a secure electricity supply?

One key factor for maintaining a secure electricity supply is the regional power market. Sweden is well-connected with its Nordic and Baltic neighbours and has become a large net exporter of electricity. As the share of wind power continues to increase, supported by green electricity certificates, regional trade becomes even more important.

ESKILSTUNA - Sweden is a global leader in building a low-carbon economy, with the lowest share of fossil fuels in its primary energy supply among all IEA member countries, and the second-lowest carbon-intensive ...
