

Syria abora solar

How do I follow Abora solar?

Follow us on Instagram, LinkedIn, Twitter or Facebook: we will share our day to day with you! Discover Abora Solar, the leading Spanish manufacturer of hybrid solar panels. Increase your energy efficiency and save on your bill.

Why did we choose a hybrid panel from Abora?

We have opted for the hybrid panel from Abora because in the same panel we can have both thermal and photovoltaic technology. In terms of profitability, we have seen that since the first day of operation, the panels have already been reducing parts of the bills for both gas and electricity month by month.

What makes Abora unique?

Over the years, Abora has demonstrated its leadership in the field of innovation. Its avant-garde character has been recognized on several occasions at the national and international levels. As members of the UN Global Compact, we work to help achieve the UN Sustainable Development Goals (SDGs).

Is Abora a good company?

Abora has managed everything, from the subsidy to the paperwork, everything, absolutely everything, has been handled through Abora. I am already recommending it because, during the period we've had it, the operation has been ideal in terms of saving both diesel energy and propane energy.

Why should you choose Abora?

At Abora, each of the panels we manufacture is thoroughly inspected. Technology has to meet the needs of our society. And being close is the only way to understand our needs. Seriousness, thoroughness, respect and commitment to what we do, is our only way to understand our work. Projects don't end when they're installed, that's where they start.

Which solar panels are made in Spain?

The solar panel, 100% made in Spain, most efficient and profitable in the world. More than 40,000 m² installed in more than 38 countries. Gamio Denalan Obras y Servicios SL. GAMIO DENALAN OBRAS Y SERVICIOS SL. As an achievement for me it is the final result of the installation: it is the largest hybrid installation that exists in Spain.

Abora's hybrid solar panels with aHTech technology are ideal for the dairy industry due to their high simultaneous production of thermal and electrical energy. Thanks to the hybrid solar installation, you will considerably reduce your energy costs (diesel, propane, electricity, etc.). In addition, you will make your company more profitable ...
