UOSSM launches the second "Syria Solar" project at Arkabat Hospital on July 16, 2019, with the support of the Idlib Health Directorate. The hospital is one of the key hospitals in Northern Syria, specializing in orthopaedics. UOSSM installed 300 solar photovoltaic panels and 12 inverters with a capacity of 90 kWp DC power, 216 batteries ...

The use of solar energy spreads from northwestern Syria, which started relying on solar power around 2016, passing through areas in the north-east, ending with the areas under the control of the Syrian regime, which directed a clear trend to generate electricity through them, not only in large industrial facilities but even in homes.

Expanding solar access for communities in Syria Solar energy is vital in reducing greenhouse gas emissions, which helps mitigate climate change. When communities have access to this clean energy, as they now do in Khirais, it increases their climate resilience, enabling them to better prepare for, recover from, and adapt to climate change.
