The Weekender ISW System combines our largest single Solar Kit and our most popular pure sine wave inverter, for a complete RV power package. The result is an economical yet powerful way to have most of the comforts you need ...

You can also get a larger inverter which plugs into your car's battery system. Depending on the size of your car, you can get 1,000-2,000 watts running power (2,000-4,000 watts peak). For \$150-\$250. Still inefficient, but better than above. 1,000 watts is enough to run a room heater at half power (they are 1,500 watts max).

1500 watt Heater Power Consumption. A 1500-watt heater will consume 1500 watts of power when running. But most oil-based heaters do not stay on all the time depending on the room temperature. So a 1500-watt inverter will consume about 1kW (1000 watts) per hour if it's running continuously for a few hours.

Highlights. Kit components include: (1) 100-Watt monocrystalline solar panel, user adjustable LCD 30 Amp solar charge controller, 40 ft. of UL Listed 12 AWG solar cable, all necessary connectors for wiring, all the necessary mounting hardware, plus the WindyNation 1500-Watt VertaMax DC to AC power inverter and 2pcs of 3 ft. 2-gauge battery cables
