

What is a Teknoware central battery system?

Teknoware's range of central battery systems starts with small systems containing just a few dozen luminaires and a single central battery unit up to centrally controlled systems containing thousands of luminaires.

What solutions does Teknoware offer?

Both centrally supplied and self-contained solutions are available. We also supply a unique fibre optic Low Location Lighting system based on our own Optiline(TM) fibre. Teknoware also manufactures a range of central battery systems. In addition to the standard features, there is also available an automatic addressable testing system.

How does Teknoware use BACnet?

Teknoware uses BACnet modules as an interface, to transfer BACnet objects from the Central Battery Systems and the luminaires. Battery and luminaire tests can also be initiated. PC software can be used to read the information of the Central Battery Systems through the BACnet bus. Also a separate COBA Software is needed for the PC.

How does Teknoware IC work?

Teknoware's IC (Intelligent Controller) system enables a large amount of different options, to turn the non-maintained emergency lights ON and OFF, by using voltage inputs, which can be freely chosen. At the same time, the voltage of several fuse boxes or general lighting can be monitored.

Do Teknoware luminaires need separate data cabling?

The testing of the luminaires is based on individual addresses, and the communication is by means of the power supply cables. Thus, there is no need for any separate data cabling between the luminaires. The luminaires must be addressable, of the Teknoware products with the letter K in the end, or they must have a separate address module.

The central battery system is compatible with all of our 230 V addressable luminaires so you can replace an existing system with ease. The TKT7 series is an easy to adapt solution for locations which need different numbers of luminaires. The central battery system in the TKT78C series is particularly suitable for medium-sized buildings.

The 7 series is compatible with all our 230 V addressable luminaires, which makes it easy to upgrade an old central battery system. The central battery unit is easily upgraded according to the number of luminaires in the property. Depending on the model, the 77C central battery unit has 24-72 output circuits.

The 31 and 41 central battery units are an easy and economical solution for supplying a relatively small

number of luminaires in a limited area. These systems are especially suitable for properties and premises where the system is to be divided into several independent areas. The 31 system has 4 output circuits.

Central battery system in TKT65xxCX series, as all our Tapsa Control central battery systems, takes care of the testing automatically. ... Teknoware Oy . Our passion is finding the best lighting, interior or emergency lighting solution for trains, buses, buildings, and ships. +358 3 883 020

TKT65B series central battery system offers an effective solution to supply medium to high number of emergency and exit lights. It is suitable for medium sized buildings. The new TKT65xxBP models are equipped with a door and ...

The central battery system in the TKT7 series offers an efficient, high-tech emergency lighting solution. You can easily modify the system according to your needs, making the new TKT7 series a truly flexible choice. ... Teknoware Oy . Our passion is finding the best lighting, interior or emergency lighting solution for trains, buses, buildings ...

Teknoware's Advanced Central Monitoring (ACM) is a centralized remote monitoring system, using a separate network, for Teknoware's addressable central battery systems. ACM uses RS485 protocol, which enables up to 1 km distance between the central battery system and the computer. 1-150 central battery systems can be connected into a single ...

The central battery system is compatible with all of our 230 V addressable luminaires so you can replace an existing system with ease. The TKT7 series is an easy to adapt solution for locations which need different numbers of luminaires. ... Teknoware Oy . Our passion is finding the best lighting, interior or emergency lighting solution for ...

Teknoware offers a 230V AC/DC-based Central Battery System (CBS) consisting of control panels, aesthetically appealing emergency and exit luminaires, sub-circuit monitoring modules, address modules to connect third-party luminaires ...

The series also is suitable for premises, where the central battery system can be decentralized to several independent areas. TKT3122 has 4 output circuits. Technical data: input voltage 230 VAC; ... Teknoware Oy . Our passion is finding the best lighting, interior or emergency lighting solution for trains, buses, buildings, and ships. +358 3 ...

The 7 series is compatible with all our 230 V addressable luminaires, which makes it easy to upgrade an old central battery system. The central battery unit is easily upgraded according to the number of luminaires in the property. Depending on the model, the 76C central battery unit has 4-24 output circuits. Max. battery capacity 150 Ah.
