Manx Solar Electrical undertakes every aspect of the installation, including annual servicing plus all requisite maintenance work. With utility prices rising and green issues climbing the agenda, there has never been a better time to invest in ...

"The solar farm would generate enough power to meet more than 7% of the Isle of Man's current electricity demand and support the Government's aim for electricity on the Island to be 100% green by 2030." The project represents an investment of around £30m across the 40-year anticipated life of the project, with no public investment.

Douglas council is to start producing its own sustainable solar energy. The local authority has approved funding for a solar farm to power some of its facilities. The generation facility would be built in Braddan and have a life span of around 20 years. It's thought the savings will mean it'll effectively pay for itself within five to seven years.

We are the only approved Tesla Powerwall certified installers for the Isle of Man and can deliver and install a Powerwall for approximately £9,500. (*) All prices are correct as of June 2022 and can change due to market conditions beyond the control of Manx Solar Electrical.
