

The Gambia latest solar

Will a new solar plant increase energy demand in the Gambia?

Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase Gambia's current generation capacity of 98 MW and enable electrification of rural areas. A strong commitment

Why should the Gambia invest in a solar plant?

Further to this, as a clean energy source and a major vehicle for climate change mitigation, the solar plant will contribute to the realisation of The Gambia's Nationally Determined Contributions". Mr. Nani Juwara, Managing Director at National Water and Electricity Company (NAWEC) "The significance of this solar plant cannot be overemphasized.

Is Gambia ready for a new era of renewables?

Gambia: strong international support for a new era of renewables with inauguration of historic 23 MWp solar plant. A significant strategic project with strong substantial economic and social impacts, the recently inaugurated solar photovoltaic plant in Jambur is poised to supply electricity to approximately 18,500 households.

What are the benefits of solar power in the Gambia?

Clean Energy: Produces 23MW of clean solar power, reducing greenhouse gas emissions and contributing to environmental protection. Energy Security: Increases energy independence and strengthens the stability and reliability of The Gambia's power grid.

What is the minimum daily solar production capacity of the Gambia?

The minimum daily solar production capacity in The Gambia is 4kWh solar power radiation per square meter. The National Development Plan (NDP) seeks to increase the share of renewable energy from 2 to 40 percent.

How does a large scale solar PV project benefit the Gambia?

The project contributes to gainful employment creation in The Gambia with 1,250 direct jobs created from the construction phase to operation and maintenance. To ensure sustainability, a three-year operations and maintenance contract (O&M) has been signed as large scale solar PV is entirely new to the sector.
