

Does Timor-Leste have a demand for solar?

3 MDF survey on understanding demand for solar in Dili, Timor-Leste. Timor-Leste's rooftop PV solar industry is new and undeveloped. Limited availability of maintenance and spare parts inhibits some businesses from switching to solar.

Is Timor-Leste a good country for solar energy?

Timor-Leste has a high-quality solar resource. The global horizontal irradiance in Dili is higher than on the east coast of Australia, where the solar market is mature and installation costs are higher. The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries.

Is there a market for roof-top solar energy systems in Timor-Leste?

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

What does a solar technician do in Timor-Leste?

Technicians in Timor-Leste have experience in small-scale, off-grid solar energy systems. Commercial or industrial scale installations are more complex and appropriate technical capacity is scarce.

Will Timor-Leste replace oil imports with solar power?

More than 75% of oil imports in Timor-Leste are used for electricity production across the country and around 90% of the sector's operating costs are fuel costs associated with power generation. The Government of Timor-Leste intends to replace part of this high-cost generation by more cost-efficient solar power.

How long does a solar system last in Timor-Leste?

High electricity costs and readily available solar radiation mean that the average payback period for a rooftop photovoltaic (PV) solar energy system in Timor-Leste is only 1.5 to 3 years instead of the global average of 6-10 years. Transitioning to solar can also help the country meet environmental commitments.

Almost 20 years since the Popular Consultation that led to the restoration of independence in the country in 2002, Timor-Leste has made significant progress. With a continued show of resilience and resolve, it has demonstrated strong commitment to reconciliation and reconstruction, as well as to human rights and democracy.

East Timor solar project, Timor Leste. In cooperation with our local partner, GSOL Energy technicians have installed a 300kWp on-grid solar PV system, which covers 50% of the annual electricity consumption of the UN House, and is ...

The UN and its partners in Timor-Leste are working towards achieving the Sustainable Development Goals:

17 interconnected and ambitious Goals which address the major development challenges faced by people in Timor-Leste and around the world. Investing more in human capital is seen as a priority for sustainable development and economic growth.

Timor-Leste has rapidly expanded electricity access to more than 83 per cent of the population but the country has yet to achieve energy security.¹ Consumer costs, even with government subsidy, remain high and outages are common. In addition, most of Timor-Leste's electricity is generated through costly and polluting diesel generators.

Com o apoio do Programa da ONU para o Meio Ambiente, Pnuma, Timor-Leste está caminhando para superar essa lacuna, estabelecendo um sistema robusto e multirrisco capaz de beneficiar diretamente 80% da população. Mas dados e tecnologias são apenas uma parte da solução. A outra depende do nível de conhecimento das pessoas sobre ...

East Timor, [a] also known as Timor-Leste, [b] officially the Democratic Republic of Timor-Leste, is a country in Southeast Asia comprises the eastern half of the island of Timor, the exclave of Oecusse on the island's north-western half, and the minor islands of Atauro and Jaco.
