Turakurgan Combined Cycle Power Plant is a 900MW gas fired power project. It is located in Namangan, Uzbekistan. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active.

The tender saw participation from two bidders, with ACWA Power offering a competitive rate of \$4.09 per kWh for electricity generation and storage, outbidding Masdar's offer of \$4.99. The price encompasses both the cost of electricity generation and storage, rather than charging separately for each service. This is not ACWA Power's first venture in Uzbekistan.

Additionally, ongoing efforts are underway for the construction of another power station with a capacity exceeding 500 megawatts in Jizzakh region, reflecting the company's commitment to enhancing Uzbekistan's energy sector capabilities.

The standard voltage in Uzbekistan is 220V, and the frequency is 50Hz. Devices from countries with different voltage standards, like the United States (120V), may require a voltage converter in addition to a plug adapter.
