

How many MW is a solar power plant in the Ivory Coast?

The authorities in the Ivory Coast have completed a 37.5 MW solar plant, with a second development phase now underway to increase its capacity to 80 MW. The first phase of a solar power plant in the northern part of the Ivory Coast has been inaugurated.

How much solar power does Ivory Coast have in 2023?

Ivorian Energy Minister Mamadou Sangafowa Coulibaly has also revealed plans to expand the capacity of the Boundiali plant to 80 MW. According to the International Renewable Energy Agency (IRENA), Ivory Coast had 46 MW of installed solar at the end of 2023. This content is protected by copyright and may not be reused.

When will Ivory Coast's solar power plants be built?

The minister said that contracts are currently under review for the construction of other solar power plants, with a cumulative capacity of 600 MW. Commissioning of these projects will take place in 2025 and 2026. Coulibaly said the Ivory Coast's installed solar capacity currently stands at 2,907 MW.

How much does the Ivory Coast electricity project cost?

The project, which has a total cost of EUR75.6 million (\$81.8 million), is expected to power 70,000 homes, saving 60,000 tons of CO₂ equivalent per year. It is creating more than 300 direct and indirect jobs during construction. The project is part of efforts to diversify electricity production in the Ivory Coast.

How much energy does the Ivory Coast have?

It currently has a capacity of 37.5 MW, but Coulibaly says this is set to expand to 80 MW, with financing for the expansion already approved by the Council of Ministers. The Ivory Coast has vowed to reduce its greenhouse gas emissions by 32% and increase the share of renewable energy in its energy mix to more than 40% by 2030.

What is the largest solar project in Africa?

The project has been billed as the country's largest to date. The government of the Ivory Coast has signed a concession agreement with infrastructure investor PFO Africa for a 52 MW solar PV plant in the village of Sokhoro, in the northern part of the West African country.

AMEA Power, one of the fastest growing renewable energy companies based in the Middle East, announced today it has signed a concession agreement and 25-year Power Purchase Agreement (PPA) with ...

Ivory Coast also shows a strong potential for the development of solar energy, especially on the northern part of the country with a Solar Global Horizontal Irradiation averaging 2077 kWh/m². Solar energy in Ivory Coast is getting increasingly competitive: 424 MW should be installed by 2030 according to the national plan.

Meanwhile, the Ivory Coast inaugurated the 37.5 MW Boundiali power plant, which is the first photovoltaic solar plant in the country and the largest in West Africa. "In five years, the share of solar energy will be 9%," stated the Prime Minister of Ivory Coast, Robert Beugré Mambé, during the power plant inauguration on April 24.

The planned solar parks will be built through public-private partnerships (PPPs) and will be hooked to the grid. The Ivory Coast aims at producing at least 42% of its power from renewable energy sources by 2030. For solar in particular, it targets 400 MW of generating capacity by the end of next decade.
