

Tunisia smappee energy

What does smappee do?

Smappee is an award-winning global cleantech company that aims to save its customers energy and money by reducing energy consumption and improving energy efficiency. Smappee's future-proof energy management system uses state-of-the-art technology to analyze the real-time use of electricity and solar power.

What is smappee's future-proof energy management system?

Smappee's future-proof energy management system uses state-of-the-art technology to analyze the real-time use of electricity and solar power. The system not only provides a large amount of highly valuable, actionable data down to the appliance level but also allows users to control their energy flows.

What percentage of Tunisia's electricity is renewable?

In 2022, only 3% of Tunisia's electricity is generated from renewables, including hydroelectric, solar, and wind energy. While STEG continues to resist private investment in the sector, Parliament's 2015 energy law encourages IPPs in renewable energy technologies.

Who produces electricity in Tunisia?

State power utility company STEG controls 92.1% of the country's installed power production capacity and produces 83.5% of the electricity. The remainder is imported from Algeria and Libya as well as produced by Tunisia's only independent power producer (IPP) Carthage Power Company (CPC), a 471-MW combined-cycle power plant.

What are Tunisia's energy projects?

One third of the projects will be for wind farms and two thirds for solar photovoltaics. Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023.

How much power does Tunisia produce?

Tunisia has a current power production capacity of 5,944 megawatts (MW) installed in 25 power plants, which produced 19,520 gigawatt hours in 2022. State power utility company STEG controls 92.1% of the country's installed power production capacity and produces 83.5% of the electricity.

One tool for all energy flows. Africa is struggling with its energy supply. "Due to the lack of electricity and water as well as regular load shedding, home-owners and companies need to deal with their energy as efficiently as ...

One tool for all energy flows. Africa is struggling with its energy supply. "Due to the lack of electricity and water as well as regular load shedding, home-owners and companies need to deal with their energy as efficiently as possible", says Stefan Grosjean, CEO at Smappee. "It is the right time to introduce the Smappee

Solar electricity and energy efficiency are crucial components of our planet's sustainable energy future. To pave the way for policy and other organizations WWF launched the WWF Upfront program in 2016. This three ...

Choose Smappee CPO or e-MSP services for a simple and convenient all-in-one payment solution. Smappee CPO services handle payment and billing for charging sessions to your charging stations. EV riders can charge with their charge cards connected to Smappee's or a third-party e-MSP. Smappee will then periodically reimburse you for the costs.

Smart energy monitoring manufacturer Smappee has debuted its new Modbus energy meter. Tailored for industrial and commercial sites, Smappee's Modbus energy meter offers accurate submetering and energy metering functionalities. The data is transferred via Modbus RTU (RS-485) to any 3rd party gateway, data logger or scada system

A Smappee energy monitor gives you these insights at a glance. Just open the Smappee App or Dashboard on your smartphone, tablet or computer and immediately know how much energy you're consuming and producing in real-time and per hour, day, month and year for electricity, solar, gas and water. See your always on usage and what appliances are ...

Smappee helps you drive a better future with smart charging and energy management solutions. For home and for business. ... Become a trusted Smappee installer. Be ahead of the energy curve and expand your product range. With the professional training of the Smappee Academy, it is easy to become a highly rated Smappee Certified Installer. ...

Smappee's real smart charging relies on sophisticated data exchange systems that are automated and integrated with AI to ensure the most economical, well-timed, driver-oriented and infrastructure-friendly solution.. Smappee's real smart charging makes it hands-free to always charge at the best rates, with maximum solar energy and avoiding exorbitant capacity rates, ...

Advanced energy intelligence sets us apart. Smappee's advanced energy management system, the Infinity, integrates with our charging infrastructure and drives smart functions. This not only helps your charging stations charge smarter but also creates smart insights into the energy consumption of your building. So, you will have all you need to make wise energy choices and ...

Bied Energy-as-a-service (EaaS) aan. Versnel je bedrijf als aggregator of energiedienstverlener (ESP) met Smappee's kant-en-klare oplossing. In plaats van alleen kilowatturen te leveren, bied je energiediensten op abonnementsbasis aan door middel van opvolging, geautomatiseerd beheer op afstand en optimalisatie van elektrische ladingen en energieverbruik.

Smappee EV charging stations ensure cost-efficient charging of your car at home, work or on the road. Up to 6x cheaper. But that's not all. Smappee analyzes your consumption of electricity, solar energy, water and gas
