

With its luxurious specifications cutting-edge technology the AITO M8 pure-electric model is expected to capture a significant position in premium market. With availability black obsidian ...

Recently, the new Buick GL8 FirstLand PHEV was spotted undergoing road testing. As the first plug-in hybrid MPV featuring the 5C supercharging technology, the new car boasts standout ...

As electric vehicles (EVs) gain momentum worldwide, the future of EV battery technology is more than a matter of performance -- it's a question of safety, sustainability, and global scalability. ...

This premier battery conference kicks off with a high-level plenary featuring opening ceremonies, keynote speeches, and executive dialogues. Along with the Leaders Closed-door Roundtable, these sessions will bring together ...

Taking the 2025 AITO M9 equipped with CATL's 166Wh/kg ultra-high energy density battery as an example. This battery meets industry-leading structural and thermal safety standards, and is ...

On a recent site visit to Caterpillar Electric Power's Malaga Demonstration & Learning Centre, Power Technology caught up with design engineer Holly Gregory to discuss how the ...

Proponents say it offers a crucial source of ingredients used to make rechargeable batteries and other 'green' technologies needed to decarbonise the planet. - Migration pact - Tuvalu inked a ...

The battery industry moves at a fast pace: The articles Battery Technology publishes represent only a fraction of what's happening in this quickly evolving industry. That's the idea behind this curated and regularly updated ...

Japan's Strategic Role in Next-Gen Battery Development As the global mobility industry races toward electrification, Japan is emerging as a leader in advanced battery technologies. With ...

China has put export restrictions on technologies critical for producing electric vehicle batteries, in a move to consolidate its dominance in the sector that has contributed to the country's ...

Apart from proposing to tighten export restrictions on battery cathode material preparative technology, China plans to enhance export curbs on specific technologies and processes used for extracting metallic gallium and lithium, ...

China restricts battery cathode material technology exports Beijing has added battery cathode material

## Tuvalu battery technologies

preparation technology to its restricted export list. The move affects lithium iron ...

According to an Australian outlet, citing Tesla Korea certification data, the higher WLTP range is due to the LR AWD's battery capacity increasing from 81.65 kWh to 84.85 kWh. The price of ...

Sodium is more than 500 times more abundant than lithium, which is available in a few countries. Sodium-ion battery charges faster than lithium-ion variants and have a three times higher lifecycle. However, sodium-ion ...

China has imposed export restrictions on eight key EV battery technologies as the country seeks to consolidate its dominance in the global EV race. The move makes it harder for Chinese ...

Plus de 80% des habitants des Tuvalu, archipel du Pacifique menacé par la montée du niveau des océans, cherchent à obtenir un visa pour l'Australie dans le cadre d'un traité signé en ...
