

Türkiye energy supply food

How is energy used in Türkiye?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

What is Turkey's energy strategy?

Turkey has prioritised security of energy supply as one of the central pillars of its energy strategy, including efforts to boost domestic oil and gas exploration and production, diversify oil and gas supply sources and associated infrastructure, and reduce energy consumption through increased energy efficiency.

Why does Turkey need a long-term energy policy agenda?

Türkiye's reliance on natural gas use has grown along with rising oil and gas imports, leaving the Turkish economy increasingly exposed to the volatility in oil and gas prices. There is an identified need to set a longer-term energy policy agenda for 2030.

Can Türkiye utilise its rooftop solar potential?

Türkiye can utilise its rooftop solar potential to catch up with installation rates in EU countries and get on track to meet its clean energy targets. Rooftops in Türkiye have a technical potential of 120 GW and can meet 45% of the country's total electricity demand.

How much wind power does Türkiye have?

Rooftops in Türkiye have a technical potential of 120 GW and can meet 45% of the country's total electricity demand. As of the end of 2023, Türkiye had an installed wind power capacity of 11.8 GW, while the NEP's 2035 forecast for wind power plants is 30 GW. Regarding Türkiye's 150 GW of wind potential, the target seems to be falling behind.

How much electricity is generated by natural gas in Türkiye?

Thus, the share of electricity generation from natural gas in total generation fell to 16% in December - the lowest level in December for five years. Although Türkiye has added 11 GW of wind and solar capacity in the last five years, other European countries have proved this is possible in a single year.

Turkey has prioritised security of energy supply as one of the central pillars of its energy strategy, including efforts to boost domestic oil and gas exploration and production, diversify oil and gas supply sources and ...

The United States is today sanctioning nearly 400 entities and individuals for enabling Russia's prosecution of its illegal war. In this action, the Department of State is imposing sanctions on more than 120 individuals and entities. Türkiye has signed a 10-year liquefied natural gas supply agreement with Shell Plc, a significant move aimed at strengthening its position as a regional energy hub. The agreement starting in 2027 includes an option to redirect shipments to Europe, aligning with Ankara's broader strategy to enhance its role in the European energy market. ...

Türkiye's energy landscape has changed dramatically in the last several years due to the need to meet global decarbonization targets, improve energy security, and lessen reliance on imports. Türkiye's growing reliance on liquefied natural gas (LNG) is a major factor in this change, as shown by historic agreements with global energy giants like TotalEnergies, ...
