Here's how one plant copes Workers at a Ukrainian thermal power plant are repairing the facility after rocket strikes to restore power as temperatures drop, Oct. 4.

Does Russia target Ukraine's energy grid?

Russia targets Ukraine's energy grid as winter sets in. Here's how one plant copes Workers at a Ukrainian thermal power plant are repairing the facility after rocket strikes to restore power as temperatures drop, Oct. 4. Editor's note: This story is part of a series on Ukraine's energy industry under attack.

Will Russia destabilise Ukraine's power system?

Since 2022, Russian targeting of Ukraine's power infrastructure has sought to destabilise the electricity system by disabling large coal and gas-fired generation units and key parts of the transmission network.

Will the US help Ukraine withstand Russian strikes on energy infrastructure?

Meanwhile, the EU and U.S. recently earmarked a combined \$112 million in energy equipment and building for DTEK, the private Ukrainian power company. The aid is supposed to help Ukraine continue to weather Russian strikes on energy infrastructure, the most recent of which was on Nov. 17.

Which countries have used rebar to protect Ukraine's energy infrastructure?

The EU and the U.S. have also donated air defense systems that shoot down Russian drones and missiles. Meanwhile, Ukrenergo, Ukraine's state-run energy company, has used materials like concrete and rebar supplied by the U.S. Agency for International Development to build shelters shielding the most critical energy equipment.

How important is interconnection to Ukraine's electricity security?

Interconnection with the main European system has made a crucial contribution to Ukraine's electricity security, with the limit on cross-border trade increasing to 1.7 GW in November 2023. Before the 2022 invasion, Ukraine's power system was interconnected with the Russian and Belarussian grids.

Today's Northern Power System started in 2014 as the operational branch of Northern Power Systems in Italy, successfully installing and managing over 450 plants in 4 years. In 2019 NPS became an independent company acquiring exclusive operating licenses on the technology developed by NPS and completely maintaining the staff and technical ...
