

Largest hybrid plant in Portugal The international developer, based in Ireland, is currently expanding a 219 MW solar park in Vaqueros, southern Portugal, into a co-location facility with a capacity of over 1 terawatt-hour, ...

Why Understanding Solar Controllers Is Critical For C& I And Utility-Scale Projects Solar controllers play a central role in managing the complexity of commercial and industrial (C& I) and utility-scale solar installations. They act as the system's ...

Portuguese electric utility group EDP (ELI:EDP) plans to build an up to 100-MWp solar project to power the country's first carbon-neutral data centre campus, currently under development by ...

Based on a geospatial data-driven approach, it combines georeferenced assessment of solar potential and high-resolution demand data with energy vulnerability indicators for both heating ...

Utility-scale solar farms are vast installations designed to generate solar power at a massive scale, typically selling the electricity produced to the grid. These facilities differ significantly ...

According to ICSC Chief Data Scientist Jephraim Manansala, this rise in unregistered solar affects how distribution utilities plan and manage the grid. SPECTRUM classifies rooftop solar into ...

The new analysis predicts that utility-scale solar is expected to continue growing in the EU this year. In 2025, the segment will likely contribute to around half of all new capacity additions. ...

Enbridge has made a final investment decision on the Clear Fork solar project in Texas, a 600-megawatt facility whose entire output will be acquired by Meta Platforms Inc. under a long ...

The International Renewable Energy Agency's latest report finds little change in the global average levelized cost of electricity for utility-scale solar plants year-on-year, while the global ...

Section 25D--the one that gives homeowners the residential solar tax credit--is now set to expire for systems installed after December 31, 2025. Section 48E, which helped commercial and ...

Lazard's analysis of levelized cost of electricity across fuel types finds that new-build utility-scale solar, even without subsidy, is less costly than new build natural gas, and competes with ...

The International Renewable Energy Agency's latest report finds little change in the global average levelized cost of electricity for utility-scale solar plants year-on-year, while the global average total installed cost of
