

Will Uzbekistan be a green economy?

It also plans to double its energy efficiency indicator, reduce the carbon intensity of GDP, and provide the entire population and all economic sectors with access to modern, inexpensive and reliable energy. Uzbekistan's considerable RES potential could spur significant development of a green, environmentally friendly economy.

How much energy does Uzbekistan use?

Uzbekistan's total renewable energy capacity was 1 844 MW in 2018, which covered about 3% of total energy consumption. On average, 10-12% of the country's total electricity is generated from RES. Renewable energy goals

Can Uzbekistan use solar energy?

In fact, solar energy's technical potential is almost four times the country's primary energy consumption. Its favourable climate and geographical location would allow Uzbekistan to use solar energy for a wide range of industrial purposes. Wind energy potential totals 2.2 Mtoe, with 19% technical development possible.

Can Uzbekistan convert to natural gas-fuelled vehicles?

In 2019, the Government of Uzbekistan launched a programme for converting to natural gas-fuelled vehicles. Currently, more than 800 000 cars use compressed natural gas (CNG) and liquefied petroleum gas (LPG).

Does Uzbekistan have an environmental protection concept?

Uzbekistan has adopted an Environmental Protection Concept of the Republic of Uzbekistan until 2030 and a roadmap for its implementation. The Concept pays particular attention to environmental protection in the energy sector.

What is the temperature of groundwater in Uzbekistan?

The average temperature of Uzbekistan's geothermal waters is 45.5°C, and the highest thermal potentials for groundwater have been recorded in the Bukhara (56°C) and Syrdarya (50°C) regions. The best opportunities for developing geothermal energy are in the Fergana Valley, but subsoil heat is available for use in a number of other areas.
