

Finden Sie jetzt 124 zu besetzende Battery Research Development Jobs auf Indeed , der weltweiten Nr. 1 der Online-Jobboards. (Basierend auf Total Visits weltweit, Quelle: comScore)

What technologies are needed to achieve this - and how can application-oriented research help to bring ideas from basic research closer to the industrial application? These are the challenges addressed by the European research ...

A European research project led by AIT (Austrian Institute of Technology) is developing innovative nanocomposites from recycled silicon for high-performance, environmentally friendly lithium-ion batteries. How can lithium ...

The electric vehicle (EV) battery market is experiencing rapid growth driven by increasing demand for EVs, stringent emission regulations, and government incentives. One of the most ...

Advanced Li-ion batteries have required an incredible amount of research and development to reach the point where they are now: playing a central role in important sustainability efforts, ...

The integration of artificial intelligence (AI) into materials science has catalyzed a transformative revolution in energy storage technology, particularly in the development of advanced ...

Apart from utilizing the lithium metal foils to enhance its own lithium-sulfur and lithium metal batteries, Li-S Energy is also providing the foils to academic institutions, commercial ...

Berkeley Lab AMCR researchers have developed a machine learning framework that dramatically accelerates battery lifespan predictions--using far fewer experiments--by combining expert ...

The global firefighting battery-powered fan market is experiencing robust growth, driven by increasing demand for lightweight, portable, and efficient ventilation solutions in firefighting ...

A transformative research partnership led by Swansea University in the UK, in collaboration with tertiary institutions in Kenya and Nigeria, has secured major UK government funding to fast ...

Battery capacity aging detection equipment manufacturer identifies with Yishengda - EST group is a national high-tech enterprise that provides full industry supply chain services for the new ...

The International Flow Battery Forum (IFBF) concluded its 15th edition in Vienna, Austria, bringing together 350 delegates interested in energy storage from all over the world. The event marked ...

# Vienna battery research and development

Our Research Group Hybrid Electric Aircraft Technologies part of the Center for Transport Technologies is looking for new Ingenious Partner for our location in Vienna. Our focus lies on ...

Two projects led by the University of Oxford have received a major funding boost from the Faraday Institution, the UK's flagship institute for electrochemical energy storage research. The funding is part of a £19 million ...

Farasis Energy previously stated that its all-solid-state battery research and development adopts a high-nickel ternary + soft pack + stacking process route, and believes that the main ...

The initiative is designed to enhance the EU's strategic autonomy in the battery sector and reduce reliance on external suppliers at a time when global demand for EV batteries is soaring. ...

Given the rising importance of cost-effective solutions in battery research, this study employs an accessible testing approach using low-cost, sensor-equipped platforms that enable broader ...
