

The Vietnam thermal runaway protection insulation market for new energy vehicles (NEVs) is witnessing robust growth due to the surging adoption of electric vehicles (EVs) and hybrid ...

Electric vehicles (EVs) have emerged as a pivotal technology for environmental protection, driving the development of battery energy storage systems (BESS) for sustainable charging solutions ...

Canada's energy storage market is on the brink of substantial expansion, driven by increasing demand for electricity from electric vehicles, hydrogen production, and industrial use. This growth is further supported by ...

The Vietnamese Electric Vehicle Market Report is Segmented by Vehicle Type (Passenger Cars, Commercial Vehicles, and More), Propulsion (Battery Electric Vehicles, Plug-In Hybrid Electric Vehicles, and More), Driving ...

HCM City has proposed construction of an electric vehicle (EV) battery recycling center with an annual capacity of 3,000 tons. The initiative is part of a broader plan to transition to electric ...

From logistics and warehousing, where electric forklifts and pallet jacks are becoming standard to meet carbon neutrality goals, to facility maintenance on large campuses, airports, and resorts. ...

Ho Chi Minh City aims to build an electric vehicle battery recycling center with a capacity of about 3,000 tons/year, capable of recovering up to 95% of precious metals in used batteries.

This is directly linked to the demand for improved battery energy densities, leading to the widespread adoption of nickel-rich cathodes in high-performance batteries. Growth Factors: ...

KSTAR made a strong debut at Solar & Storage Live Vietnam 2025, introducing a comprehensive lineup of smart PV and energy storage solutions tailored to Vietnam's evolving power ...

As part of a roadmap to transition 400,000 vehicles to electric in Ho Chi Minh City, the municipal Institute for Development Studies (HIDS) has proposed building a standardized battery ...

Two Korean companies, S-OIL and Bumhan Unisolution, just signed a pact to work together to further develop energy storage systems (ESS) and electric vehicle battery pack systems using ...

The shift toward greener mobility has been underway in Vietnam and the local electric vehicle (EV) market is

Vietnam energy storage for electric vehicles

expected to see double-digit growth thanks to favorable policies, infrastructure ...

He noted that a battery plant in Ha Tinh Province has partnered with global battery recycler Li-Cycle on supply, recycling, and research into a potential recycling system in Vietnam. In ...

Demand-side management is a broad concept encompassing everyday technologies like smart thermostats, electric vehicles, energy-efficient products, distributed solar and battery storage. ...

Hanoi, Vietnam - Livoltek, a leading provider of smart energy solutions, is set to participate in the upcoming Solar & Storage Live Vietnam 2025, an event that brings together industry leaders ...

The motorcycle ban in Vietnam has put an end to traditional motorcycle travel, but it has also opened up a new door for environmentally friendly and efficient electric vehicle travel! The ...

Automaker General Motors has signed a nonbinding memorandum of understanding with battery recycler Redwood Materials the companies say is meant to accelerate the deployment of ...

Vietnam energy storage for electric vehicles
