

According to ICSC Chief Data Scientist Jephraim Manansala, this rise in unregistered solar affects how distribution utilities plan and manage the grid. SPECTRUM classifies rooftop solar into ...

According to data from the Polish utility PGE, Poland added more than 6.8 GW of new PV capacity in the first five months of the year, bringing the total to 21.2 GW by June 1st. This ...

Explore how Avaada is shaping India's clean energy future with utility-scale Battery Energy Storage Systems (BESS), including a landmark 2.1 GW project to support a sustainable and ...

The International Renewable Energy Agency's latest report finds little change in the global average levelised cost of electricity for utility-scale solar plants year-on-year, while the global ...

The new analysis predicts that utility-scale solar is expected to continue growing in the EU this year. In 2025, the segment will likely contribute to around half of all new capacity additions. ...

Conclusion In the pursuit of optimizing utility-scale solar projects, both tracking systems and fixed-tilt arrays present unique advantages and challenges. A comprehensive analysis considering ...

VS B Group has recently secured a significant contract for a solar energy project in Poland, marking a substantial step forward in the country's renewable energy sector. With a capacity of 303 megawatts peak (MWp), this solar park, located ...

Why Understanding Solar Controllers Is Critical For C& I And Utility-Scale Projects Solar controllers play a central role in managing the complexity of commercial and industrial (C& I) and utility-scale solar installations. They act as the system's ...

As part of this year's renewable energy auction organized by the Polish Energy Regulatory Office (URE), VS B has secured a contract for difference (CfD) for a 303 megawatt-peak (MWp) solar park: the largest solar project in the history of ...

To get the year started off right, we're highlighting some of the solar-related concepts that we think are particularly important to understand in 2025. We know that to reach our solar and ...

As part of this year's renewable energy auction organized by the Polish Energy Regulatory Office (URE), VS B has secured a contract for difference (CfD) for a 303 megawatt-peak (MWp) solar ...

In the USA, the solar LCOE stood at \$0.070/kWh in 2024. There was a more notable change in the global

weighted average total installed cost (TIC) of utility-scale solar projects in 2024, ...

9. Italy's Solar Adoption Italy has achieved 36,000 megawatts of installed capacity. The country's picturesque landscapes and government incentives have fostered widespread rooftop solar ...

It resulted in a residential rooftop market collapse of over 60% versus 2023 in most of the group. Similarly, Poland, Spain, and Germany are experiencing a decline of over 40%. Good news ...

Utility-scale projects still marching on Paradoxically, utility-scale solar is accelerating, buoyed by oversubscribed auctions that increasingly pair PV with storage. SolarPower Europe estimates ...

SPE expects EU solar installations to fall to 64.2 GW in 2025, ending its decade-long growth streak Falling power prices and incentive cuts hit residential solar in several markets, including ...

Warsaw utility-scale solar
