Who is SATEC telemetry & energy management?

For over 35 years now, prominent global utilities and industrial leaders have made SATEC their go-to choice, for both off-the-shelf and bespoke solutions, for telemetry and energy management, working together with us on product design. SATEC designs, develops and manufactures in-house its full range of products, hardware and software alike.

What makes SATEC unique?

Aspiring to tailor-fit clients with optimized performance per cost, SATEC takes modularity to the extreme, presenting equipment and software available as basic platforms for further upgrade and expansion with diverse selectable functionality and a variety of ports and features.

Are SATEC meters a 'mini RTU'?

Combined with advanced control functionality (I/O) and advanced connectivity, SATEC meters are often applied as 'mini RTUs'. Today's industrial sector has high awareness of energy optimization and reduced carbon footprint.

Consult with us. The contemporary business mindset is often based on a practical solution-oriented approach. As a result-driven client, you prefer the greater picture and bottom line over the ins and outs of technically complex systems.

Portable (Class A, Ed. 3) PQ Analyzer. The EDL180 is a portable version of the Class A (Edition 3) PM180 power quality analyzer, which holds extensive track record serving as the platform for power quality monitoring systems in worldwide national grids. Equipped with a 24V battery for backup power supply and flexible current clamps, it is fitted in a lightweight traveling bag for ...

4 ???&#0183; Chile's stance on the Western Sahara dispute has evolved significantly over the years. ... including global health challenges, energy transition and its prospects, and transformations ...

Our Acceptable Use Policy sets forth the rules and guidelines for using SATEC network, systems, and services. It prohibits activities such as unauthorized access, distribution of malware, and any form of abuse or misuse of our resources. ... Should you have other questions or concerns about these policies, please contact your representative or ...

The PRO series is SATEC's newest, cost-effective line of power meters for advanced power applications, including waveform recording and AC/DC power metering. The compact PRO Series meter is available as the PM335 panel mount form factor design and the EM235 DIN-rail form factor design. With an advanced communication platform including IEC ...

Solutions: SATEC's Expertpower energy management suite manages all clients and bills on one platform, enabling quick update and sync with ERP systems. See Expertpower EMS. B. Surcharge management. Every user has a unique profile of energy spending, affected by the different electrical appliances in use and peak consumption. This involves, for ...

Transparent Gateway: from serial communication to TCP/IP communication Protocol Converter for all third-party instruments. Multi-protocol: MBUS; Modbus; DNP TCP/IP; ASCII TCP/IP; Data Server Applications The ETC-II Data Server polls data from instruments in background mode, using Modbus protocol (Modbus master).

For over a decade SATEC has pioneered the implementation of this advanced communication protocol, starting with its flagship, the PM180 power quality analyzer. Ever since, SATEC has set the goal of implementing IEC 61850 in its leading products, new releases, as well as legacy products. See below SATEC products featuring IEC 61850.

SATEC EM132 is a multifunction power meter and transducer, ideal for a wide range of applications such as industrial power monitoring and for interfacing SCADA in utility substations. The EM132 can be fitted with a wide range of communication interfaces and I/O extensions, making it a cost-effective combination of a power meter, smart ...

Stay informed with SATEC's News & Events page, featuring the latest developments, products, and innovative solutions in energy management. ... SATEC is looking to expand its global partner network. Would you like to work with us? Application Note Disturbance Direction Detection.

Measure, Analyze, Optimize and Save Expertpower is a comprehensive energy management software suite offering a range of applications. These include Meter Data Management (MDM), billing, monitoring, business intelligence (BI), energy efficiency, demand response, in-depth power quality analysis, and support for core planning and forecasting processes of independent ...

SATEC has now officially launched a solution for Direct Current metering, based on the SATEC PRO meter, using Hall Sensors. This application is suitable for a wide range of DC voltage and current measurement: up to 3,000A DC / 2,500V DC. DC current systems are widespread in various fields, including:

Based on the SATEC PRO meter, this solution makes use of Hall Effect Sensors, attaining remarkable accuracy. It is suitable for a wide range of DC voltage and current measurement: up to 4,000A and 2,000V DC. For further details, including specification and technical configuration, please read our application note and book a demo.

With Battery Energy Storage Systems (BESS) becoming an important component in the modern electric network, Taipower sought to employ BESS as a solution for balancing distribution networks' supply and demand, indicated by rising and falling frequency.
