What is MOSJ - environmental monitoring of Svalbard & Jan Mayen?

MOSJ (Environmental Monitoring of Svalbard and Jan Mayen) is an environmental monitoring system and part of the Norwegian Government's environmental monitoring in Norway. The site provides historical climate records (ocean, land, and atmosphere), including temperature, precipitation, snow, permafrost, and sea-ice.

Where are Svalbard and Jan Mayen located?

The islands are located north and northwest of Norway, within the southern limits of Arctic sea ice -- the northernmost point of Svalbard is within a 620 mi (1,000 km) of the North Pole. Svalbard is approximately 24,570 square mi (63,000 square km); Jan Mayen is approximately 145 square mi (373 square km).

What is the difference between Svalbard and Jan Mayen?

Svalbard is an archipelago in the Arctic Ocean under the sovereignty of Norway, but is subject to the special status granted by the Svalbard Treaty. Jan Mayen is a remote island in the Arctic Ocean; it has no permanent population and is administered by the County Governor of Nordland.

Why is heating so popular in Longyearbyen?

Heating is provided in Longyearbyen by long-distance heating from the coal power plant, and the locals are generous when using this precious resource. The reason is not only the climate, which in fact is not even that much colder in the maritime climate of Spitsbergen compared to continental parts of Scandinavia.

Who governs Svalbard?

The archipelago is administered by the Governor of Svalbard, which is subordinate to the Norwegian Ministry of Justice and Public Security. Unlike the rest of Norway (including Jan Mayen), Svalbard is a free economic zone and a demilitarized zone, and is not part of the Schengen Area nor the European Economic Area.

Does Svalbard have an ISO code?

While a separate ISO code for Svalbard was proposed by the United Nations, it was the Norwegian authorities who took initiative to include Jan Mayen in the code. Its official language is Norwegian. Both Svalbard and Jan Mayen consist almost entirely of Arctic wilderness, such as at Bellsund in Svalbard.

Svalbard and Jan Mayen An Arctic Pastor On The Front Lines Of Climate Change As head of the northernmost parish in the world, Leif Helgesen has a clear (and often chilly) view of global warming. LONGYEARBYEN -- At just over 1,000 km from the North Pole, Longyearbyen -- population 2,300 -- is home to more polar bears than people.
