

The gas storage regulation was adopted in June 2022, at the heart of the energy crisis, to ensure sufficient storage levels crucial to supply EU homes and businesses throughout winter and ...

Special emphasis will be placed on the need to build new grid infrastructure, including interconnection lines, as well as on optimizing the existing network through the introduction of smart grids and the integration of energy ...

Existing battery projects in California and Texas see upside, while hybrid storage bets in the Midcontinent Independent System Operator (MISO) territory and the Southeast face shrinking margins under the revised tax credit rules.

Recently, the German Federal Court of Justice (BGH) issued a landmark ruling confirming that local grid operators have the right to charge grid connection fees (BKZ) for energy storage projects. This decision not only directly impacts the ...

Agência Nacional de Energia Elétrica (ANEEL), Brazil's electricity regulator, will publish initial energy storage regulations in the second half of 2025, with two additional consultation phases ...

A. Tax credits relevant for energy storage projects Among others, the following three tax credits are especially relevant to energy storage projects. All are impacted by the Prohibited Foreign ...

On July 17, Gotion High-Tech, a Chinese battery manufacturer, launched production of its 5MWh Gotion GRID energy storage system at its Göttingen, Germany facility, as announced on its ...

This paper establishes a joint clearing model for energy storage participation in electricity and frequency regulation markets, optimizing power resource allocation through market-oriented ...

Polish ministries want to find compromise in regulations on energy storage facilities Poland's Ministry of Economic Development and Technology (MRiT) and the Ministry of Climate and ...

The sulfide-based solid electrolyte market is experiencing significant growth, driven by the increasing demand for safer and higher-performing batteries in electric vehicles (EVs) and ...

(2) Regulation (EU) 2022/1032 amended Regulation (EU) 2017/1938 by introducing a temporary legal framework for measures regarding the filling level of underground storage facilities to strengthen the security of gas supply ...

# Zagreb energy storage regulations

Phase-change microcapsules offer significant advantages for thermal energy storage and regulation. However, conventional mechanical agitation fabrication methods encounter ...

The new law adopted by the European Union extends gas storage regulations until 2027, obliging member states to maintain 90% of capacity by December 1. Flexibility has been introduced to ...

The Clean Electricity Investment Tax Credit under Section 48E of the Internal Revenue Code (IRC) represents a pivotal incentive for advancing zero-emission electricity generation and ...

Agência Nacional de Energia Elétrica (ANEEL), Brazil's electricity regulator, will publish initial energy storage regulations in the second half of 2025, with two additional consultation ...

India-UK Vision 2035: Nations to Deepen Collaboration on Energy Storage, Grid Transformation Under the India-UK Vision 2035, the two countries aim to drive ambitious energy security and ...

The precise regulation of distributed energy storage resource pools can enhance the capacity to stabilize the peak-valley load difference of the power grid, mitigate load fluctuations, ensure ...
